Dear Andreas,

We wish Nipponia SA will be successful and get more orders ! feel very regretted that we could not visit the INTERMOT.

Re: T-box from motorcycle + Normal key
It can be realized from technical proposal (Theory) with T-box based on motorcycle + Normal key , but T-box supplier need re-develop the T-box firmware and software accordingly , it will take half year .So we can not offer you this kind of version at the moment .

Current T-box from E-viball with SIM card plugged in
T-box based on motorcycle with SIM card mounting , SIM card can not be changed

Re: Current T-box + Greenway battereis best price FOB Qingdao port

e-Viball (DY1500DT - 2 seat) 1 battery	RMB12080/unit
e-Viball (DY1500DT - 2 seat) 2 batteries	RMB15370/unit
e-Viball (DY1500DT - 1 seat) 1 battery	RMB12142/unit
e-Viball (DY1500DT - 1 seat) 2 batteries	RMB15432/unit

Kindly notify that Greenway will provide us offer according to existing order , will not offer in advance . which is different from TN .

One good news , that we final get the dangerous packing certification from Luoyang customs , so we will export the E-viball with dangerous container from Qingdao port under legal/regulation operation.

Best regards,

Dear Song,

Next week we will be participating in INTERMOT presenting e-Viball two versions.

Please give me your best offer in Yuan for the e-Viball with the Greenway batteries, the improved T-BOX without FOB Key without SIM card.

When do you think that this version will be available.

Best Regards

Andreas Gorgolis
